## SECTION 4: FIRST AID MEASURES

### 4.1 DESCRIPTION OF FIRST AID MEASURES

#### General notes

Never give anything by mouth to an unconscious person. Place patient in recovery position and ensure airway patency.

#### Following inhalation

Remove patient to fresh air - move out of dangerous area. If symptoms develop and persist, seek medical attention.

#### Following skin contact

Immediately remove contaminated clothing. Do not pull solidified material or clothes from skin. Wash affected skin areas immediately with plenty of water and soap. Cyanoacrylate gives off heat on solidification. In rare cases a large drop will generate enough heat to burn. Burns should be treated normally after the adhesive has been removed from the skin. If lips are accidentally stuck together apply warm water to the lips and encourage maximum wetting. Peel or roll lips apart. Do not try to pull the lips apart with direct opposing action. If symptoms develop and persist, seek medical attention.

#### Following eye contact

Immediately flush eyes with running water, keeping eyelids apart. Cyanoacrylate will bond to eye protein and will cause periods of weeping which will help to debond the adhesive. Keep eye covered until debonding is complete. Do not force eye open. Medical advice should be sought in case solid particles of cyanoacrylate trapped behind the eyelid cause any abrasive damage. If irritation persists, seek professional medical attention.

#### Following ingestion

Do not induce vomiting! Rinse mouth thoroughly with water. The product will polymerise immediately in the mouth making it almost impossible to swallow. Saliva will slowly separate the solidified product from the mouth (several hours). Consult a physician. Show the physician the safety data sheet or label.

### 4.2 MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED

#### Following inhalation

Can cause irritation of respiratory system. Coughing, sneezing, nasal discharge, labored breathing. Feeling of tightness in the chest. Sore throat. Causes cough.

#### Following skin contact

Causes irritation of skin and mucous membrane. Itching, redness, pain. Bonds skin immediately. May cause burns to the skin.

#### Following eye contact

Strongly irritates the eyes. Redness, tearing, pain. Bonds eyelids immediately.

#### Following ingestion

Irritates mucous membranes in the mouth, throat, esophagus and in gastrointestinal area. The product will polymerise immediately in the mouth, making it almost impossible to swallow, but beware of possible choking hazard.

### 4.3 INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED

No information.

## SECTION 5: FIREFIGHTING MEASURES

## Safety data sheet

### 5.1 EXTINGUISHING MEDIA

#### Suitable extinguishing media

Carbon dioxide. Dry chemical powder. Alcohol resistant foam.

#### Unsuitable extinguishing media

Full water jet. Water.

### 5.2 SPECIAL HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE

#### Hazardous combustion products

In case of heating harmful vapours/gases can be generated. In the event of fire the following can be generated: carbon monoxide (CO), carbon dioxide (CO<sub>2</sub>).

Nitrogen oxides (NO<sub>x</sub>).

### 5.3 ADVICE FOR FIREFIGHTERS

#### Protective actions

In case of fire do not breathe fumes/gases. In a fire or if heated, a pressure increase will occur and the container may burst. Cool the endangered containers with water spray. Move undamaged containers from immediate hazard area if it can be done safely. Avoid contact with skin, eyes and clothing.

#### Special protective equipment for fire-fighters

Firefighters should wear appropriate protective clothing for firefighters (including helmets, protective boots and gloves) (EN 469) and self-contained breathing apparatus (SCBA) with a full face-piece (EN 137).

#### Additional information

Polymerises with water.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

### 6.1 PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AND EMERGENCY PROCEDURES

#### For non-emergency personnel

#### Protective equipment

Use personal protective equipment (Section 8).

#### Precautionary measures

Ensure adequate ventilation. Avoid contact with skin, eyes and clothing. Do not breathe vapours/mist.

#### Emergency procedures

Area of accident must be marked and protected. Prevent access to unauthorised personnel. Turn leaking containers leak-side up to prevent the escape of liquid.

#### For emergency responders

During intervention, use personal protective equipment (Section 8).

### 6.2 ENVIRONMENTAL PRECAUTIONS

Do not allow product to reach water/drains/sewage systems or permeable soil. If accidental large entry into water or ground occurs, inform responsible authorities.

### 6.3 METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP

#### For containment

Stem the spill if this does not pose risks.

#### For cleaning up

Large spill: Absorb product (with inert material), collect it in special container and dispose it to a licensed hazardous-waste disposal contractor. Smaller quantities treat water. Hardened (polymerized) residue mechanically remove to landfill. Do not use cloths; rags or materials made from cellulose.
